

COMPSCI 295, Winter 2025

Course Project

Instructor: Rina Dechter

Due: Wednesday, March 19th

Your final course project will primarily involve composing a summary and analysis of your assigned paper(s). Optionally, you may choose to extend your project through running experiments with the related codebase, applying the concepts to a specific problem domain, and/or any other creative work inspired by or related to the paper(s).

Required...

- 1-2 page summary of your assigned paper(s)
- 1-2 page analysis

Optional Extension...

- 1-2 pages reporting an extension based on your assigned paper(s)

Constraints...

- No paper should be longer than 6 pages unless cleared specifically by me.
- Project reports should be uploaded to Canvas and also emailed to me.
